Bark House® Poplar Bark Panels & Shingles

PRICE LIST

Poplar bark – Bark House® wall Panels & Shingles

The poplar tree can grow up to 30-45 m and has a protective bark with up to 4cm thickness. On the hot summer days the strong workmen of our partner **Bark House** are going into the forest to harvest the timber. The bark is carefully peeled from the trees in one piece, gently carried through the woods, and then covered with weights to receive an even shape.

After harvesting and drying, the bark can be used as whole piece, there is no need to mount the bark to another carrier material. The bark panels are suitable for both indoor and outdoor facades. Due to the natural condition, the treatment processes and on the basis of the panel sizes, the plates may occasionally have tiny cracks or abrasions.* Wood is naturally capable of absorbing moisture or releasing it again. Resulting, minimal dimensional variations are quite normal, this is called contraction of the wood.

Our Bark House® wall panels of poplar bark are offered in various sizes. The poplar bark panels are available in up to **3.65 m in length, the width varies to about 1.70 m.**

Each panel is unique!
The quantity of panels is strictly limited due to the harvesting regulations!

Our cost-effective alternative to the big bark panels, we also offer shingles from the poplar tree bark.

Both, the big panels and the smaller shingles are offered in different strengths. Both product types are purchasable in

Premium: 2.38 – 3.49 cm thickness
Standard: 1.27 – 2.22 cm thickness

Our Bark House® wall panels and shingles of poplar bark, used as interior and exterior wall cladding

Shingles are with a fixed height and „fragmented“ width (**45.7 cm x 120 cm, W x H** - depending on availability) much smaller. Shingles with **45.7 cm** are sold per layers, width result in layers of **0.55 m²** each (equals the minimum purchase quantity).

On the following pages we provide you a detailed overview on our actual available Bark House® poplar bark wall panels – ready to make the wall-decoration in your object outstanding as well as exclusive.
